**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to an organic electroluminescent display device, classified in class 313, subclass 504.
- II. Claims 9-13, drawn to a method for fabricating an organic electroluminescent device, classified in class 445, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the organic electroluminescent display device can be made by forming a first electrode on a sacrificial layer; forming an organic emitting layer on the first electrode; forming a second electrode on the organic emitting layer; removing the sacrificial layer thereby having an organic luminescent unit remaining; preparing a transparent substrate composed of an array unit and a ground unit; forming a ground line in the ground unit; and connecting the organic luminescent unit to the ground line.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2879

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Robert Goodell on 16 June 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2879
